

1. Introduction (overview of your project); include at least:

a. General description of your project
We are planning on creating a website where the user will be able to buy Concordia merch and other objects.

b. Reason for choosing the project
We chose this project because we thought it was an interesting idea and could be really useful.

2. Work Completed (written summary description; don't just list items from the custom milestone planning document)

- a. Planning completed
- b. Choosing roles completed
- c. Buttons completed

3. Work To Do (written summary description; don't just list items from the custom milestone planning document)
We still have to finish up most parts of the project, especially connecting JFrame's and creating the website design.

4. What is Going Well
Communication is going really well, we are able to share ideas, work together and communicate without meeting in person.

5. Challenges and Potential Resolutions
One of the biggest challenges we have to overcome is the size of this project and the multiple JFrame's that will be used to complete it. We think this problem will be easy to overcome by

working on it together and helping each other out.

6. Short Reflections (subsection for EACH group member; NOTE: visible to the entire group)

a. What you enjoy about the project
We are enjoying the idea of creating something this big, by ourselves. We are really excited to see how it will turn out!

b. What you don't enjoy about the project
The fact that it is so big makes it a little bit tedious.

7. Conclusion (summarize your work completed so far, and preview upcoming work for the next milestone)
We have already decided on each of the members' responsibilities and have started to actually work on the project, we already have our buttons done. What we have to do right now is work on the JFrame's and start designing the website.
